

Odney Bleus
6045 Triphammer Rd
Lake Worth, FL 33463

To Whom It May Concern:

As a Full Stack Web Developer graduate at the University of Central Florida. My recently finished web developing program at University of Central Florida has shaped my code evaluation and website development knowledge, and I know I have the HTML, CSS, and JavaScript skills to help your company succeed.

During my time at UCF, I developed numerous skills and strengthened existing abilities, all which would serve me well at your company. The program at UCF honed my aptitude with objects-oriented programming, user interfaces, wireframes, and node.js, among other areas.

Several of my achievements while at University of Central Florida:

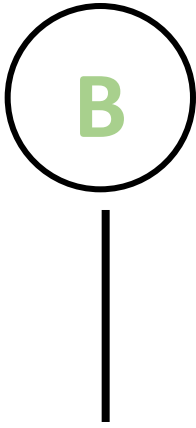

- Random Password Generator: user decides the password length of 8-128 with choices of a mixture of numbers, letters both capital and lower case, and symbols.
- Weather Forecast: searches the next four days of forecast, previous searches are saved so it is easy to click on to search for again. Used HTML, CSS, Bootstrap, and JavaScript.

As these few wins show, I am not only fond of web development work that I do, but I take great pride in it, as well. If given the chance to become a web developer at your company, I will bring that same work ethic and drive.

I would enjoy an opportunity to chat about your upcoming projects and share how my achievements at University of Central Florida can be replicated and improved at your company.

Sincerely,

Odney Bleus

Career Profile

I am a Full stack developer with a vast of array of knowledge in many different front-end and back-end languages, responsive frameworks, database, and best code practices. My objective is simply to be the best web developer that I can be and to contribute to the technology industry all that I know and can do. I am dedicated to perfecting my craft by learning from more seasoned developers, remaining humble, and continuously making strides to learn all that I can about development. I believe that my understanding of problem solving is a skill that will contribute to my overall success as a developer.

ODNEY S.

BLEUS, FULL STACK DEVELOPER
